~Home Sharing~

What is Home Sharing?

Home Sharing is a living option for a person who has a developmental disability where they share a home with someone who provides ongoing support. Support may include assistance in daily living skills, training to develop their independence, self-care, relationship-building, life skills, and access and use of community resources and activities. Referrals to receive Home Sharing services are made through CLBC.

Home Sharing providers will be matched with the specific needs, interests and lifestyle preferences of the person receiving the support. There will be many considerations involved in selecting an appropriate Home Sharing contractor for each person, while we seek to find the best matches for everyone!
