

## ***Home Share Provider Testimonial***

“I have been involved with Home Sharing for about 6 and half years. In this time through the Home Sharing management team I have had privilege to work with a few of other departments at AiMHi, Life Skills, Community Options and the IES workplace training. Everyone I have interacted with has been professional, caring and very supportive. They also offer different programs to not only support the people you are supporting but to the contractors as well. I have always felt I had a strong support system available 24/7. Personally Home Sharing has been very rewarding for my daughter and myself. As a father to a single child Home Sharing has allowed us to welcome a new people into our lives. We have both learned so much when it comes to embracing change, accepting others for who they are, learning better ways to communicate and supporting decisions made in our home. I am very happy that we are a part of Home Sharing.”
